Experience

2018 – **Researcher**, *IT4Innovations National Supercomputing Centre*, Ostrava, Czechia.
Modelling for Nanotechnologies Lab; Responsibilities: Development of software for magnetic symmetry detection and assessment of the interaction scale (`python3`); Design of new materials including robust Cobalt alloys and permanent magnets (`VASP`); Utilization of HPC libraries to model strongly-correlated electron systems with disorder (`C++17`).

2017 – **Researcher & Lecturer**, *Marian Smoluchowski Institute of Physics*, Kraków, Poland.
Member of MAESTRO team (–2018); Responsibilities: Development of high-performance low-level quantum-chemical libraries (`C++17`); Expansion and administration of the new comptutational cluster (to ~ 12 `TFLOPS DP`); Teaching (cf. Teaching section); Organization of *Spin to Cooper Pairs* conference; Research (cf. andrzejkadzielawa.github.io);

2015 – 2017 **Research assistant**, *Marian Smoluchowski Institute of Physics*, Kraków, Poland.
Member of MAESTRO team; Responsibilities: Development of high-performance low-level libraries for realistic crystalline systems (`C++11`, `python2.7`); Acquisition and administration of the new computational cluster (~ 8 `TFLOPS DP`) for Institute of Physics; Organization of *Spin to Cooper Pairs* conference; Research (cf. andrzejkadzielawa.github.io);

Education

2011 – 2015 **PhD in Physics**, *Jagiellonian University*, Kraków, Poland, *summa cum laude*.
First-Principle Approach to Electronic States and Metal - Insulator Transition in Selected Correlated Model Systems

2006 – 2011 **MSc in Physics**, *Jagiellonian University*, Kraków, Poland, Uniform interdisciplinary program with 2-years-long thesis research; physics, mathematics, computer science and biology; final grade **5.0**.
Evolution of a massless test scalar field on Boson Star space-time

2010 **Graduate Level**, *Niels Bohr Institute*, Copenhagen, Denmark.
Courses in Quantum Field Theory and Quantum Optics

Research and Scientific Activities

Conferences, Schools and Seminars

2013 – **14 oral presentations, seminars & invited lectures**, (cf. ↘).

2012 – **10 poster presentations**, (cf. `andrzejkadzielawa.github.io/projects` for details).

Publications

2013 – **8 papers**, *in peer-reviewed journals*, (cf. `andrzejkadzielawa.github.io/articles` for details).
Phys. Rev. B, Scientific Reports, Comput. Phys. Commun., New J. Phys., Acta Phys. Pol. A, Eur. Phys. J. B

Topics include: **Condensed Matter Physics, Computational Methods** — *ab-initio calculations, metallization hydrogen, high-performance computing, multilevel parallelism*

Miscellaneous

2015 – 2018 **Project MAESTRO**, *Researcher*, National Science Centre (NCN).
Fundamental Properties of Strongly Correlated Systems: Unconventional Superconductivity, Quantum Critical Behavior, and Complex Electronic Structure

2012 – 2015 **Project TEAM**, *doctoral scholarship*, Foundation for Polish Science (FNP).
Correlations and coherence in quantum materials and structures - unique properties on macro and nano scales

2010 **Erasmus student exchange**, Erasmus programme.
Niels Bohr Institute, University of Copenhagen
